

Trainings

There are many ways in which we impart our experiences and know-how about evaluation and self evaluation. Prof. Beywl has been the director of postgraduate study courses in evaluation at Bern University (Switzerland) and does now head the chair of 'Bildungsmanagement sowie Schul- und Personalentwicklung' (management of education, school and human resources development) at the University of Applied Science Nordwestschweiz.

Other members of our team use to teach at the postgraduate study courses in evaluation at Bern University (f. e. programme modelling, group methods in data collection) or conduct trainings on the topic of (self) evaluation.

Our trainings are designed to fit the needs of our clients and tie in with existing experiences and know-how of the participants. So there is not a set program of trainings offered. Trainings can be accompanied by coaching and support to transfer theory into the practice of your work. Please talk to us about your ideas and requirements.
